

Plumeria Repair Paste product guide

Description

Sydney Frangipani Plumeria Repair Paste is a ready to use silica based paste that dries hard yet flexible and is used to prevent water ponding in aged cut ends of Plumeria tree branches. Plumeria Repair Paste is easy to use and very durable. Paste is coloured Grey/brown to match the colour of mature bark.

Applications & Features

- Dries hard in approximately 4 hours @ 20c, 68F
- Prevents water ponding on cut branch ends
- Seals open wounds and protects the tree against insect entry
- Water based for ease of use and easy clean up
- Colour matches old growth Plumeria Rubra tree bark
- Remains flexible to resist cracking on a growing tree
- Continued use will prevent many potential issues, hence improving the general health of your Plumeria/Frangipani tree

Directions for use

Using disposable gloves and safety glasses, take a portion of paste and push it all the way into an aged cut end of a dry branch ensuring all pockets of air have been removed. Finish with a wiping motion to ensure a good seal is achieved and dab to neaten for a smooth finish. Wash up any tools with water and replace lid immediately after use to prevent the product drying out prematurely. Always allow freshly cut branches to dry out for at least one week before use. **For larger holes and cavities rub a small amount of paste into the hole or cavity first to pre-prime the area** and then fill the hole with the amount of paste required.

Limitations of use

Only for use on Plumeria Rubra trees and plants with healthy roots. Do not use on freshly cut or wet branches. Not to be used on sick, stressed or rot affected Plumeria trees & plants or unrooted cuttings. Sydney Frangipani Plumeria Repair Paste should only be used to seal and protect.

Remarks

Product may appear watery on the surface when opened for the first time. This is normal attribute of the product and simply stirring the liquid back into the paste will ensure uniform consistency of the product. **Always replace the lid immediately after use to ensure the product does not dry out prematurely.**

Personal protective equipment (PPE)

Disposable latex gloves - required
Safety glasses – required

Plumeria Repair Paste product guide

Technical information

General product information

Appearance:	Grey brown matt silica
Flammability/Hazard:	Non-flammable, Non hazardous
Clean UP/Thinning:	Water
Per Cent Volatiles:	Nil
Specific Gravity:	1.4
Minimum Film Forming Temperature:	5°C.
Coverage:	5mm maximum recommended film thickness
Colour	Grey/brown to match Plumeria Rubra old growth grey bark
Drying Time:	Approximately 4 hours at 20°C, 68F
Packaging Sizes:	400g
